

Benefits of Cross Training

By: Bryan Braswell, Rocky Mount Radiator

THE CONNECTIONS MADE through NARSA have afforded our company (Rocky Mount Radiator) opportunities to train, learn, and cooperate with some of the finest establishments in the Heat Exchanger industry.

Recently, a tandem of our employees took a trip to Chesapeake Cooling Systems in

Denton, Maryland to learn about Marine heat exchangers, their function, and proper service, repair, and maintenance of these units.

The team at Chesapeake welcomed our crew with open arms to help us understand a section of our industry that we aren't very familiar with so that we

may be able to add these services to our repair portfolio.

Despite our proximity and even potential for competition, this relationship has helped us expand our business and learn from others, a testament to what NARSA is all about! Thanks to Ryan, Nick, and Charlie. ■

Employees from Rocky Mount Radiator spent a week with the team at Chesapeake Cooling Solutions.

Rocky Mount Radiator crew listening to service techniques and practice around tube/shell bundles.

Inspection of a marine heat exchanger.

NARSA Members **IN ACTION**

Here's another interesting job from the team at Chesapeake Cooling Solutions involving a Caterpillar 345CL cooling package.
